

Curetis, a young, publicly traded molecular diagnostics company based in Holzgerlingen near Stuttgart, Germany, specializes in the development and marketing of reliable, fast and cost-effective solutions for the diagnosis of serious infections.

After the acquisition of the Genetic Antibiotic Resistance and Susceptibility Database ([GEAR](#)) in September 2016, we have established a dedicated team at our Ares Genetics subsidiary in Vienna ([ARES](#)) to further develop and leverage this unique bioinformatics platform and database in our product development programs as well as academic and commercial partnerships. To further advance our Ares Technology Platform we are looking for a

Web Application Developer (m/f)

for a staff function role in full-time or part-time employment at Ares Genetics in Vienna. The position reports to the Managing Director.

What we expect from you...

In your role as Web Application Developer, you will design and implement responsive web applications. You will actively engage in branding and positioning of the Ares Technology Platform as well as multidisciplinary projects around the Ares Technology Platform. You will work closely with international partners to design, develop and implement state-of-the art interactive data visualizations, dashboards and reports in order to deliver production grade informatics solutions. You will lead application and interface projects for clinicians, infectiologists and microbiologists from creative concept to delivery.

What you bring with you...

- An academic education in Computer Science, IT, UX, Web Design, ideally with exposure to life sciences and/or healthcare or a comparable qualification
- Experience in the planning and execution of web application development projects preferably in healthcare or the life sciences
- Experience with brand positioning and user engagement
- Experience in designing and developing client-side software relating to large scale data processing
- Experience with graphics tools and website design
- The ability to work in highly virtual set-ups across different geographies and cultures
- A self-starter mentality with an independent and reliable way of working
- An open and communicative mentality
- The conscious decision to work as a team player in an innovative and dynamic smaller company
- Business-fluent knowledge of written and spoken English. Knowledge of German is an advantage, but not a requirement.

What you can expect...

- A varied and exciting challenge in one of the most innovative and rapidly growing segments of the healthcare industry
- A young, dynamically growing company with short decision pathways and a flat hierarchy

- An inspirational environment at one of Europe's most prominent biotech clusters
- An attractive and competitive salary package starting at gross € 45.000 / year as well as overpayment depending on your relevant professional experience

We look forward to receiving your detailed application. Please include the reference number 111073 and preferably submit it electronically to hr@curetis.com
